Poetic phrases solicited from the general public are printed on the orange fencing used to control erosion during light rail construction. The same phrases are currently being stamped into concrete sidewalks along the new alignment.

All of the phrases are listed online at orangelining.net.

WHAT WE LOVE WILL SAVE US
Powell light rail overpass
Horatio Law

Recycled bicycle and skateboard parts are arranged to resemble skeletal remains of prehistoric dinosaurs or “velosaurus” in a series of 8 concrete bas-relief panels embedded into the retaining walls under the structure.
Three tall arches join to form an open canopy-like sculpture that serves as a landmark for the plaza and a gathering place for the community.
