---

Staff led committee members on a tour of SE 17th Ave where they viewed many of the Orange Lining stamps in the sidewalk and a number of the boat sculptures near the future Rhine St Station. Members were pleased with the quality of the stamps and with the scale of the sculptures relative to the surrounding area. The group then toured the Bullseye Glass Company facility and visited with the employees assembling the shelter column mosaics. Committee members commented on the quality of the craftsmanship and how faithful the mosaics are to the original paintings.

Committee members expressed an interest in touring the light rail bridge over the Willamette River at a future meeting.

_The next meeting will be scheduled as needed._
