Executive Summary

TriMet is proposing to implement several service improvements in fall 2018 and spring 2019. In accordance with Title VI of the Civil Rights Act of 1964 and FTA Circular 4702.1B, TriMet conducts an Equity Analysis any time Major Service Changes are proposed to ensure that changes do not unfairly impact people of color and low-income populations. The service proposal includes Major Service Changes to twelve bus lines, including two brand new lines. Thus, an analysis is required prior to the TriMet Board of Directors taking action.

Methodology

TriMet’s Title VI Program outlines the agency’s Major Service Change, Disparate Impact, and Disproportionate Burden policies, as well as the way in which TriMet conducts Equity Analyses. Major Service Changes are analyzed for both potential adverse effects and distribution of benefits. This is done at both the individual line-level and system-level, and the analysis seeks to identify any potential disparities based on race/ethnicity or income.

Major Service Changes

The proposed addition of two brand new bus lines, a line split into two lines, and the proposed changes to nine existing lines meet TriMet’s established thresholds for Major Service Changes:

- Line 272 - Airport Bus Line (New)
- Line 31 - Webster Line (New)
- Line 4 - Division/Fessenden
- Line 24 - Fremont
- Line 61 - Marquam Hill/Beaverton
- Line 64 - Marquam Hill/Tigard
- Line 66 - Marquam Hill/Hollywood
- Line 68 - Marquam Hill/Collins Circle
- Line 73 - 122nd Avenue
- Line 79 - Clackamas/Oregon City
- Line 81 - Kane/257th
- Line 96 - Tualatin/I-5

Findings

1. **No system level disparate impact or disproportionate burden** for the 12 major service increases.

2. **A slightly greater percentage** of the District’s non-minority population stands to benefit from the proposed service improvements compared to the minority population (20% vs. 19.1%, respectively).

3. The vast majority of improvements are on lines with **average-or-above low-income populations** in their service areas. As a result, a greater share of the region’s low-income populations stand to benefit as compared to higher income populations.

4. **No disproportionate and adverse effects** from the one major service reduction (Line 79). The minority and low-income populations in this service area are below the disparate impact and disproportionate burden thresholds.

I. Background

Building upon several years of ongoing service improvements, TriMet’s Annual Service Plan for FY2019 proposes Major Service Changes to ten bus lines and the addition of two new bus lines. Other changes will involve all night service on several lines, additional peak hour trips on an over-loaded line, and improvements in on-time performance for lines with high ridership but lower current reliability. Though these changes will represent improvements for riders on those lines, they are not large enough changes to be reviewed as Major Service Changes. The Major Service Changes presented here represent the large majority of TriMet’s proposed changes for FY19. The TriMet Board’s approval of a ten-year payroll and self-employment tax rate increase in 2015 makes the changes possible.

TriMet has engaged the community for the past few years to develop a shared vision for future transit service that will guide how the additional revenue is invested. Each year, TriMet staff will use information developed from the shared vision planning efforts and outreach, updated analyses and measures, and additional outreach to prioritize incremental service improvements for that year. The efforts will focus on five factors defined by the TriMet Board: demand, productivity, connections, equity, and growth. Each year’s plan will also consider safety, budget availability, and availability of staff and equipment to provide for expanded service.

This report documents the equity analysis conducted for these changes.

II. TriMet Title VI Compliance

As a recipient of Federal Transit Administration ("FTA") financial assistance, TriMet must ensure that service changes – both increases and reductions – comply with Title VI of the Civil Rights Act of 1964, which states:

“No person in the United States shall, on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance."

The FTA has provided specific implementing guidelines and regulations for complying with Title VI in Circular 4702.1B ("Circular"). The Circular instructs transit agencies to consider impacts of Major Service Changes on low-income populations as well as minority populations by conducting a service equity analysis. Figure 1 shows the general sequence of steps and considerations in the equity analysis process.

TriMet’s Title VI Program outlines the agency’s policies, definitions and procedures for complying with Title VI and performing equity analyses. As required by the Circular, this includes the agency’s Major Service Change, Disparate Impact, and Disproportionate Burden policies, as set forth below.

---

1 Fiscal year 2019 runs from July 1, 2018 to June 30, 2019.
2 TriMet’s Title VI Program was updated and submitted to FTA in fall 2017
A. Major Service Change Policy

All changes in service meeting the definition of Major Service Change are subject to a Title VI Equity Analysis prior to Board approval of the service change. A Title VI Equity Analysis will be completed for all Major Service Changes and will be presented to the Board for its consideration and included in the subsequent TriMet Title VI Program with a record of action taken by the Board.

A **Major Service Change** is defined as:

1. A change to **15% or more of a line’s route miles**. This includes routing changes where route miles are neither increased nor reduced (i.e. re-routes), or;

2. A change of **15% or more to a line’s span** (hours) of service on a daily basis for the day of the week for which a change is made, or;

3. A change of **15% or more to a line’s frequency** of service on a daily basis for the day of the week for which a change is made, or;

4. A single transit line is **split** into two or more transit lines, or;

5. A **new transit line** is established.

A Major Service Change occurs whether the above thresholds are met:
   a) Within a single service proposal, or;
   b) Due to a cumulative effect of routing, span, or frequency changes over the three years prior to the analysis.
B. Disparate Impact Policy

Testing for Disparate Impact evaluates effects on minority riders or populations as compared to non-minority riders or populations. “Minority” is defined as all persons who identify as being part of racial/ethnic groups besides white, non-Hispanic.

In the course of performing a Title VI Equity Analysis for possible disparate impact, TriMet will analyze how the proposed major service change or fare change action could impact minority populations, as compared to non-minority populations.

In the event the proposed action has an adverse impact that affects protected populations more than other populations at a level that exceeds the benchmarks established in the adopted Disparate Impact Policy, or that restricts the benefits of the service change to protected populations, the finding would be considered as a potential Disparate Impact. Given a potential Disparate Impact, TriMet will evaluate whether there is an alternative that would serve the same objectives and with a more equitable impact. Otherwise, TriMet will take measures to minimize or mitigate the adverse impact of the proposed action.

The Disparate Impact Policy defines measures for determination of potential Disparate Impact on minority populations resulting from Major Service Changes or any change in fares. The policy is applied to both adverse effects and benefits of Major Service Changes. Adverse effects of service changes are defined as:

1. A decrease in the level of transit service (span in days and/or hours, and/or frequency); and/or
2. Decreased access to comparable transit service, which is defined as an increase of the access distance to beyond one-quarter mile of bus stops or one-half mile of rail stations.

The determination of disparate impact associated with service changes is defined separately for impacts of changes on an individual line, and for system-level impacts of changes on more than one line, as well as for both service reductions and service improvements.

1. In the event of potential adverse effects resulting from service reductions:
   a) A Major Service Change to a single line will be considered to have a potential Disparate Impact if the percentage of impacted minority population in the service area of the line exceeds the percentage of minority population of the TriMet District as a whole by at least 3 percentage points (e.g., 31 percent compared to 28 percent).
   b) To determine the system-wide impacts of Major Service Change reductions on more than one line, the percentage of the TriMet district’s minority population that is impacted is compared to the percentage of the TriMet district’s non-minority population that is impacted. If the percentage of the minority population impacted is at least 20 percent greater than the percentage of the non-minority population impacted (e.g., 12 percent compared to 10 percent), the overall impact of changes will be considered disparate.
2. In the event of service improvements:

   a) A major service change to a single line will be considered to have a potential Disparate Impact if:

      i. The improvement is linked to other service changes that have disproportionate and adverse effects on minority populations, or;

      ii. The percentage of impacted minority population in the service area of the line is less than the percentage of minority population of the TriMet District as a whole by at least 3 percentage points (e.g., 25 percent compared to 28 percent).

   b) To determine the system-wide impacts of major service change improvements on more than one line, the percentage of the TriMet district’s minority population that is impacted is compared to the percentage of the TriMet district’s non-minority population that is impacted. If the percentage of the minority population impacted is at least 20 percent less than the percentage of the non-minority population impacted (e.g., 8 percent compared to 10 percent), the overall impact of changes will be considered disparate.

3. Additional considerations to complement the quantitative Disparate Impact analysis above may include evaluating impacts to accessing employment, education, food, or health care for minority populations.

Upon determination of Disparate Impact, TriMet will either:

   a) Alter the service proposal to avoid, minimize, or mitigate potential Disparate Impacts, or;

   b) Provide a substantial legitimate justification for keeping the proposal as-is, and show that there are no alternatives that would have a less Disparate Impact on minority riders but would still accomplish the project or program goals.

C. Disproportionate Burden Policy

Testing for Disproportionate Burden evaluates potential effects on low-income riders or populations, defined as at or below 150% of the federal poverty level. The line and system level evaluations are identical to those used to determine potential Disparate Impacts, but compare low-income and higher income populations rather than minority and non-minority populations.

III. Proposed Service Changes

A. Description of Changes

Table 1 lists the proposed service changes by the quarter in which they would take effect. Most changes proposed for the next year are service increases. However, one of the proposed changes (Line 79) include the removal of service to some stops as part of their proposed routing changes.
Table 1: Proposed Service Changes in FY19 Annual Service Plan

<table>

</table>
| Fall 2018 | 4 - Division/Fessenden      | ➢ One route between Gresham Transit Center and Downtown Portland  
|           |                             | ➢ One route between Downtown Portland and St. Johns                                          |
|           | 61 - Marquam Hill/Beaverton | ➢ Add earlier and later trips during the weekday                                            |
|           | 64 - Marquam Hill/Tigard    | ➢ Add earlier and later trips during the weekday                                            |
|           | 66 - Marquam Hill/Hollywood | ➢ Add earlier and later trips during the weekday                                            |
|           | 68 - Marquam Hill/Collins Circle | ➢ Add earlier and later trips during the weekday                                           |
|           | 73 - 122nd Avenue           | ➢ Increase weekday midday frequency.                                                       |
|           | 81 - Kane/257th             | ➢ Increase weekday peak frequency  
|           |                             | ➢ Add earlier and later trips during the weekday                                            |
|           | 96 - Tualatin/I-5           | ➢ Add midday service between Tualatin and Downtown Portland                              |
|           | 272 - Airport Bus Line (New) | ➢ New line connecting Burnside Street via 82nd Avenue to Portland International Airport |
| Spring 2019 | 24 - Fremont               | ➢ Extend route over the Fremont Bridge to NW Portland and Goose Hollow in SW Portland  
|           |                             | ➢ Increase weekday frequency  
|           |                             | ➢ Add weekend service                                                                     |
|           | 31 - Webster Line (New)     | ➢ New line connecting Clackamas Town Center and Oregon City Transit Center                  |
|           | 79 - Clackamas/Oregon City  | ➢ Change route to 82nd Avenue, I-205, and Washington Street  
|           |                             | ➢ Eliminate service on Strawberry Lane                                                    |

Note: The FY19 Annual Service Plan also includes some minor changes to several bus lines (17, 20, 35, 56, 57, and 94) for the purpose of addressing reliability and capacity issues. These changes are not included in this analysis because they are too small to reach the Major Service Change threshold.
B. Major Service Change Test

To determine whether individual service changes meet the definition of Major Service Change, current and proposed service are compared in terms of route length, frequency, and span (hours) of service. Changes of 15% or more qualify as Major Service Changes, including changes meeting this threshold cumulatively over the course of three years.

Results of the comparison are shown in Table 2. To summarize, these changes meet TriMet’s adopted Title VI Major Service Change definition:

- **Line 4 – Division/Fessenden:** Split line
- **Line 24 – Fremont:** Route length change of over 15%; Frequency increase of over 15% on weekdays; New weekend service
- **Line 31 – Webster:** New bus line
- **Line 61 – Marquam Hill/Beaverton:** Change in span of over 15% on weekdays
- **Line 64 – Marquam Hill/Tigard:** Change in span of over 15% on weekdays
- **Line 66 – Marquam Hill/Hollywood:** Change in span of over 15% on weekdays
- **Line 68 – Marquam Hill/Collins Circle:** Change in span of over 15% on weekdays
- **Line 73 – 122nd Avenue:** Frequency increase of over 15% on weekdays
- **Line 79 - Clackamas/Oregon City:** Route length change of over 15%
- **Line 81 – Kane/257th:** Frequency increase of over 15% on weekdays; Change in span of over 15% on weekdays
- **Line 96 – Tualatin/I-5:** Frequency increase of over 15% on weekdays
- **Line 272 – Airport Bus:** New bus line

*Proposed routing changes include both removing and adding portions to Line 79.*
C. Line-level Analyses

Having identified the service changes which meet the definition of Major Service Change, the next step in the analysis is to look at each line individually to determine potential Disparate Impacts (minority populations) and/or Disproportionate Burdens (low-income populations). Both service reductions and service increases are analyzed. For service reductions, the analysis examines whether adverse effects are disproportionately borne by minority and/or low-income populations. On the other hand, for service increases the analysis examines the extent to which the benefits of the improvements are inclusive of minority and low-income populations.

The line-level analysis compares minority and low-income populations for the service area of each line proposed for a Major Service Change to the minority and low-income populations of the TriMet District as a whole. The analysis is separated by type of service change being proposed:

1. Major Service Reduction
2. Major Service Increases
3. Other Major Service Changes

1. Major Service Reduction
For service reductions the analysis examines whether adverse effects (defined on pg. 3) are disproportionately borne by minority or low-income populations. If adverse effects are identified and a line’s minority and/or low-income populations are at least 3 percentage points greater than the minority or low-income populations for the TriMet District as a whole, the proposed change is flagged as a potential Disparate Impact or Disproportionate Burden.

The proposal for the Line 79 includes the only Major Service Reduction in this service plan.

- **Line 79 (Route streamlining, including stop removals)**
  The Line 79 route change would improve connections between Oregon City Transit Center and Clackamas Town Center. Doing so would remove Line 79 service from a total of 9 stops, including both directions of service. Seven of these stops (which serve 40 out of the 44 daily ons/offs) have comparable service within ¼ mile, and the population in the surrounding area is 17% minority and 20% low-income, as shown in Figures 2 and 3. Thirty-six of the current stops served by Line 79, along Webster, Oatfield, E. Dartmouth, W. Arlington, and McLoughlin Blvd, will be served by the new Webster Line.

  Two stops, where the remaining 4 daily ons/offs occur, do not have comparable service within ¼ mile, thereby meeting the definition of adverse effect (see Table 3). The population in the area surrounding these stops is 15% minority and 16% low-income, which are below the Disparate Impact threshold (31%) and Disproportionate Burden threshold (27%) for Major Service Reductions. Thus, there is no Disparate Impact and no Disproportionate Burden.

---

3 This section only analyzes the service reduction component of the Line 79 service change proposal. The analysis of the service increase component is provided in the next section.

*Averse effect applies

Figure 2: Minority Population Comparison

Proposed Line 79 (Coverage Removed) Major Service Reduction

*Minority population below threshold = No line-level Disparate Impact

Source: 2011-2015 American Community Survey, block group level
In terms of access\textsuperscript{4}, this change would remove service from:

- About 7,626 jobs
  - 62\% are low-to-medium wage jobs, which is higher than the TriMet district average
  - 9\% are jobs held by people of color, which is lower than the TriMet district average
  - 8\% are jobs held by Hisp/Latino workers, which is similar to the TriMet district average

2. **Major Service Increases**

For service increases, the analysis examines the extent to which the *benefits* of the improvements are inclusive of minority and low-income populations.

Figure 4 displays the minority population along each line\textsuperscript{5} proposed for a major increase as compared to the 25\% Disparate Impact threshold. Figure 5 displays the low-income population along each line as compared to the 21\% Disproportionate Burden threshold. Because these are proposed service increases, protected populations *falling below* these thresholds are flagged for potential concerns. The narrative analysis of each individual line follows, which includes further considerations of access to jobs, education, health care, and food for minority and low-income populations.

\textsuperscript{4} Access defined as within $\frac{1}{4}$ mile of a stop on the line. For full details of access to services by line, see Attachment B.

\textsuperscript{5} Line 79 shown separately for clarity.
Figure 4: Minority Population Comparison
Lines with proposed Major Service Increases & Disparate Impact Threshold

Line below threshold = Flag for potential line-level Disparate Impact

Source: 2011-2015 American Community Survey, block group level

Figure 5: Low-income Population Comparison
Lines with proposed Major Service Increases & Disproportionate Burden Threshold

Line below threshold = Flag for potential line-level Disproportionate Burden

Low-income defined as at or below 150% federal poverty level.
**Line 272 – Airport Bus** *(New bus line)*

The proposed routing for this line would potentially benefit a service area population that is **33% minority** and **32% low-income** which are both well above the Disparate Impact (25%) and Disproportionate Burden (21%) thresholds for Major Service Increases. Thus, there is **no Disparate Impact** and **no Disproportionate Burden** at the line-level.

In terms of access, this line would **provide new service** to:

- About 31,000 jobs
  - 64% are low-to-medium wage jobs, which is much greater than the TriMet district average
  - 12% are jobs held by people of color, which is equal to the TriMet district average
  - 9% are jobs held by Hispanic/Latino workers, which is slightly greater than the TriMet district average
- 4 employment and housing resource centers
- 3 high school
- 1 community health care service centers
- 4 grocery stores and supermarkets, two of which are Asian grocers

**Line 31 – Webster** *(New bus line)*

The proposed routing for this line would potentially benefit a service area population that is **19% minority** and **22% low-income**, which are both well below the Disparate Impact (25%) and Disproportionate Burden (21%) thresholds for Major Service Increases. This indicates a potential Disparate Impact and Disproportionate Burden, calling for further examination, in particular the considerations below as well as the system-level analysis provided in the next section.

In terms of access, this line would **maintain service**\(^6\) to:

- Over 18,992 jobs
  - 64% are low-to-medium wage jobs, which is greater than the TriMet district average
  - 11% are jobs held by minorities, which is slightly less than the TriMet district average
  - 8% are jobs held by Hispanic/Latino workers, which is similar to the TriMet district average
- 2 community college
- 2 middle school and 2 high schools, including 1 alternative high schools
- 4 community health care service centers
- 5 grocery stores/supermarkets

In terms of access, this line would **provide new service** to:

- Over 1,297 jobs
  - 68% are low-to-medium wage jobs, which is greater than the TriMet district average
  - 8% are jobs held by minorities, which is less than the TriMet district average
  - 8% are jobs held by Hispanic/Latino workers, which is similar to the TriMet district average
- 1 grocery store/supermarket

\(^6\) Stops removed from Line 79 will be maintained by the New Webster line
Line 79 – Clackamas/Oregon City (Route change)

The Line 79 proposal includes a route change that will serve a new area on the entire new line. As shown in Figure 6, the entire new line has a population that is 21% minority which is below the Disparate Impact threshold (25%) for Major Service Increases. This indicates a potential Disparate Impact, calling for further examination, in particular the considerations below as well as the system-level analysis provided in the next section. On the other hand, the newly served area population (see Figure 7) is 26% low-income, which is above the Disproportionate Burden threshold (21%) for Major Service Increases. Thus, there is no Disproportionate Burden at the line level.

In terms of access, the route change would provide new service to:

- About 462 jobs
  - 66% are low-to-medium wage jobs, which is much greater than the TriMet district average
  - 4% are jobs held by minorities, which is less than the TriMet district average
  - 7% are jobs held by Hisp/Latino workers, which is lower than the TriMet district average
- 1 grocery stores/supermarkets
- 2 human and social services centers

In terms of access, this line would improve service to:

- About 33,940 jobs
  - 62% are low-to-medium wage jobs, which is much greater than the TriMet district average
  - 8% are jobs held by minorities, which is less than the TriMet district average
  - 10% are jobs held by Hisp/Latino workers, which is above the TriMet district average
- 3 employment resource center
- 5 human and social services centers
- 4 grocery stores/supermarkets, including one Asian grocer

Figure 6: Minority Population Comparison
Proposed Line 79 (New Coverage) Major Service Increase

Line below threshold = flag for potential line-level Disparate Impact

Source: 2011-2015 American Community Survey, block group level
**Line 96 – Tualatin/I-5 (Weekday frequency increase)**

This service increase would potentially benefit a service area population that is 25% minority and 25% low-income, which are at or above the Disparate Impact and Disproportionate Burden thresholds for Major Service Increases. Thus, there is no Disparate Impact and Disproportionate Burden at the line level.

The frequency increase would improve service to:

- Over 99,000 jobs
  - 48% are low-to-medium wage jobs, which is less than the TriMet district average
  - 11% are jobs held by minorities, which is slightly less than the TriMet district average
  - 7% are jobs held by Hisp./Latino workers, which is slightly less than the TriMet district average
- 6 high schools, 5 of which are private
- 11 grocery stores/supermarkets
- 12 human and social services centers
- 2 employment resource centers

**Line 81 – Kane/257th (Weekday frequency increase and span improvements)**

This service increase would potentially benefit a service area population that is 26% minority and 31% low-income, which are above the Disparate Impact and Disproportionate Burden thresholds for Major Service Increases. Thus, there is no Disparate Impact and Disproportionate Burden at the line level.
The frequency increase would improve service to:

- About 17,675 jobs
  - 66% are low-to-medium wage jobs, which is above the TriMet district average
  - 12% are jobs held by minorities, which is similar to the TriMet district average
  - 9% are jobs held by Hisp./Latino workers, which is above the TriMet district average
- 1 community college and 3 high schools
- 5 grocery stores/supermarkets
- 4 human and social services centers

**Line 24 (Route extended and frequency increase)**

The Line 24 proposal includes both a route change that will serve a new area and a frequency increase on the entire new line. As shown in Figure 6, the entire new line has a population that is 25% minority, which is equal to the Disparate Impact threshold for Major Service Increases (25%). On the other hand, the area that would be newly served by the route change to the Line 24 has a population that is 21% minority, which is below the Disparate Impact threshold for Major Service Increases (25%). This indicates a potential Disparate Impact, calling for further examination, in particular the considerations below as well as the system-level analysis provided in the next section.

![Figure 8: Minority Population Comparison](image-url)
As shown in Figure 9, the entire new line has a population that is **27% low-income**, while the area that would be newly served by the route change to the Line 24 has a population that is **27% minority**. Both of these are above the Disproportionate Burden threshold for Major Service Increases (21%). Thus, there is **no Disproportionate Burden** at the line-level.

![Figure 9: Low-Income Population Comparison](source)

Thus, there is no **potential Disproportionate Burden** related to the route change or increase in frequency. However, there is a **potential Disparate Impact** related to the route change, calling for further examination, in particular the considerations below as well as the system-level analysis provided in the next section.

In terms of access, the route change would provide **new service to**:

- About 26,396 jobs
  - 50% are low-to-medium wage jobs, which is less than the TriMet district average
  - 11% are jobs held by minorities, which is slightly less than the TriMet district average
  - 6% are jobs held by Hisp/Latino workers, which is lower than the TriMet district average
- 3 high schools, including 2 private high schools
- 8 grocery stores/supermarkets
- 6 human and social services centers

The frequency increase would **improve service to**:

- About 39,378 jobs
  - 53% are low-to-medium wage jobs, which is less than the TriMet district average
• 12% are jobs held by minorities, which is equal to the TriMet district average
• 6% are jobs held by Hisp/Latino workers, which is lower than the TriMet district average
• 4 employment resource centers
• 4 human and social services centers
• 7 grocery stores/supermarkets, including one Asian grocer

➢ **Line 73 – 122nd Avenue** *(Weekday frequency increase)*
This service increase would potentially benefit a service area population that is **40% minority** and **38% low-income**, which are well above the Disparate Impact and Disproportionate Burden thresholds for Major Service Increases. Thus, there is **no Disparate Impact** and **Disproportionate Burden** at the line level.

The frequency increase would **improve service** to:
• About 14,166 jobs
  ▪ 74% are low-to-medium wage jobs, which is well above the TriMet district average
  ▪ 14% are jobs held by minorities, which is above the TriMet district average
  ▪ 9% are jobs held by Hisp./Latino workers, which is above the TriMet district average
• 1 community college campus
• 2 middle schools and 1 high school
• 4 grocery stores/supermarkets
• 3 human and social services centers

➢ **Line 61 – Marquam Hill/Beaverton** *(Weekday span improvements)*
This service increase would potentially benefit a service area population that is **27% minority** and **27% low-income**, both of which exceed the Disparate Impact (25%) and Disproportionate Burden (21%) thresholds for Major Service Increases. Thus, there is **no Disparate Impact** and **no Disproportionate Burden** at the line-level.

In terms of access, this increase would **improve service** to:
• About 40,000 jobs
  ▪ 47% are low-to-medium wage jobs, which is less than the TriMet district average
  ▪ 15% are jobs held by minorities, which is greater than the TriMet district average
  ▪ 6% are jobs held by Hisp./Latino workers, which is less than the TriMet district average
• 10 grocery stores/supermarkets, including one Asian grocer
• 7 community health care service centers
• 1 employment resource center
• 1 middle school and 2 high schools

➢ **Line 64 – Marquam Hill/Tigard** *(Weekday span improvements)*
This service increase would potentially benefit a service area population that is **16% minority** and **20% low-income**, both of which are below the Disparate Impact (25%) and Disproportionate Burden (21%) thresholds for Major Service Increases. This indicates a **potential Disparate Impact and Disproportionate**
Burden, calling for further examination, in particular the considerations below as well as the system-level analysis provided in the next section.

In terms of access, this increase would improve service to:

- About 45,000 jobs
  - 47% are low- to-medium wage jobs, which is less than the TriMet district average
  - 15% are jobs held by people of color, which is greater than the TriMet district average
  - 7% are jobs held by Hisp/Latino workers, which is less than the TriMet district average
- 2 high schools
- 5 human and social services centers
- 7 grocery stores/supermarkets, including 1 Mediterranean grocer

➤ **Line 66 – Marquam Hill/Hollywood** *(Weekday span improvements)*

This service increase would potentially benefit a service area population that is **17% minority** and **19% low-income**, both of which are below the Disparate Impact (25%) and Disproportionate Burden (21%) thresholds for Major Service Increases. This indicates a potential Disparate Impact and Disproportionate Burden, calling for further examination, in particular the considerations below as well as the system-level analysis provided in the next section.

In terms of access, this increase would improve service to:

- About 49,000 jobs
  - 45% are low- to-medium wage jobs, which is less than the TriMet district average
  - 14% are jobs held by people of color, which is greater than the TriMet district average
  - 6% are jobs held by Hisp/Latino workers, which is less than the TriMet district average
- 1 employment resource center
- 1 high school
- 8 community health care service centers
- 3 human and social services centers
- 10 grocery stores/supermarkets

➤ **Line 68 – Marquam Hill/Beaverton** *(Weekday span improvements)*

This service increase would potentially benefit a service area population that is **26% minority** and **41% low-income**, both of which exceed the Disparate Impact (25%) and Disproportionate Burden (21%) thresholds for Major Service Increases. Thus, there is no Disparate Impact and no Disproportionate Burden at the line-level.

In terms of access, this increase would improve service to:

- About 42,000 jobs
  - 39% are low-to-medium wage jobs, which is less than the TriMet district average
  - 15% are jobs held by minorities, which is greater than the TriMet district average
  - 5% are jobs held by Hisp./Latino workers, which is less than the TriMet district average
- 3 high schools
• 2 alternative/trade schools
• 2 grocery store/supermarkets
• 8 human and social services centers

3. **Other Major Service Changes**

One of the proposed changes, while qualifying as a Major Service Changes, does not necessarily increase or reduce service. Evaluating potential distribution of adverse effects or benefits of the changes is not applicable, and therefore there is no potential **Disparate Impact** and no potential **Disproportionate Burden** under TriMet’s Title VI policies. Even so, TriMet still analyzed the details of the proposed changes for potential equity impacts.

➤ **Line 4 – Division/Fessenden** (Line split)

The Line 4 is proposed to be split into two lines and would share stops Downtown Portland. The first segment of the route would run between St. Johns and Downtown Portland and the second segment would run between Downtown Portland and the Gresham Transit Center. There would be no service increase or reduction after the split.

As shown in Figures 10 and 11, the service area for each route segment have minority and low-income populations well above average for the TriMet district. Thus, there is **no Disparate Impact** and **no Disproportionate Burden** at the line-level.

![Figure 10: Minority Population Comparison](image)

**Proposed Line 4 Line Split & TriMet District**

*No service increase or reduction after split.*

*Source: 2011-2015 American Community Survey, block group level*
D. System-level Analysis

Because more than one line is proposed for a Major Service Change, a system-level analysis is required in addition to the line-level analysis. The system-level analysis aims to measure impacts of all Major Service Changes combined to determine how equitable the impacts would be across racial/ethnic and economic lines. Service increases and service reductions are analyzed separately in order to examine both potential system-level adverse effects and distribution of benefits.

- **System-level Disparate Impact Analysis: Major Service Increases**
  
The system-level Disparate Impact analysis of Major Service Increases is completed by determining what portion of the TriMet District’s minority population stands to benefit from the Major Service Change improvements, and comparing that to the portion of the District’s non-minority population that potentially benefits. A potential Disparate Impact would exist if minority populations benefitted substantially less than non-minority populations. The way we measure this is to test whether 20% less (or 4/5) of the District’s minority than non-minority population stood to benefit from the improvements.

---

**Figure 11: Low-income Population Comparison**

Proposed Line 4 Line Split & TriMet District

*No service increase or reduction after split.*

![Low-income Population Comparison](image)

Source: 2011-2015 American Community Survey, block group level. Low-income defined as at or below 150% federal poverty level.
Table 4 and Figure 12 compare the positively impacted minority and non-minority populations. A slightly greater percentage of the District’s non-minority population stands to benefit by the proposed Major Service Increase compared to the minority population (20% vs. 19.1%, respectively). However, the difference does not meet the Disparate Impact Threshold of 16%: given the 20% of the non-minority population will benefit from the increases, the percentage of the minority population impacted would have to be at least 16% to meet the definition of a system-level Disparate Impact. Therefore, no System-level Disparate Impact is found related to the proposed Major Service Increases.

<table>

Minority and Non-minority Populations

- Minority Pop: 19.1% Impacted (Positively), 81.5% Not Impacted
- Non-Minority Pop: 20.0% Impacted (Positively), 80.7% Not Impacted

System-level Disparate Impact Analysis: Major Service Reductions

The system-level Disparate Impact analysis of Major Service Reductions is completed by determining what proportion of the TriMet District’s minority population is potentially adversely impacted from the service reductions and comparing that to the District’s non-minority population that may be adversely impacted. A potential Disparate Impact would exist if minority populations were impacted substantially more by service reductions than non-minority populations. The way we measure this is to test whether 20% more of the District’s minority than non-minority population were impacted by the service reductions.

Table 5 and Figure 13 compare the impacted minority and non-minority populations. A greater percentage of the District’s non-minority population is potentially impacted by the proposed Major Service Reductions as compared to the minority population (0.9% vs. 0.4%, respectively). Therefore, no System-level Disparate Impact is found related to the proposed Major Service Reductions.
Table 5: System-level Disparate Impact Analysis of Major Service Reductions

- Non-Minority Pop
  - 0.9% Impacted by Reductions
  - 99.1% Not Impacted

➢ **System-level Disproportionate Burden Analysis: Major Service Increases**

The System-level Disproportionate Burden analysis is completed by determining what proportion of the TriMet District’s low-income population is positively impacted by the Major Service Increases, and comparing that to the District’s higher income population that is positively impacted. “Higher income” includes all persons above the low-income threshold of 150% of the federal poverty level. A potential Disproportionate Burden would exist if low-income populations benefitted substantially less than higher income populations. The way we measure this is to test whether 20% less (or 4/5) of the District’s low-income than higher income population stands to benefit from the improvements.

Table 6 and Figure 14 compare the impacted low-income and higher income populations. A greater percentage of the District’s low-income population stands to benefit from the proposed Major Service Increases as compared to the higher income population (23% vs. 18.6%, respectively). Therefore, **no System-level Disproportionate Burden** is found related to the proposed Major Service Increases.
### Table 6: System-level Disproportionate Burden Analysis of Major Service Increases

- **Higher Income Pop**
  - 18.6% Impacted (Positively)
  - 82.0% Not Impacted

---

**System-level Disproportionate Burden Analysis: Major Service Reductions**

The system-level Disproportionate Burden analysis is completed by determining what proportion of the TriMet District’s low-income population is potentially adversely impacted from the service reductions and comparing that to the District’s higher income population that may be adversely impacted. “Higher income” includes all persons above the low-income threshold of 150% of the federal poverty level. A potential Disproportionate Burden would exist if low-income populations were impacted substantially more by service reductions than higher income populations. The way we measure this is to test whether 20% more of the District’s low-income than higher income population were impacted by the service reductions.

Table 7 and Figure 15 compare the impacted low-income and higher income populations. A greater percentage of the District’s higher income population is potentially impacted by the proposed Major Service Reductions as compared to the low-income population (0.8% vs. 0.5%, respectively). Therefore, **no system-level Disparate Impact** is found related to the proposed Major Service Reductions.
IV. Community Engagement

The service proposals analyzed in this report stem from a multi-year planning and outreach process to develop a vision for future transit service in the Portland metropolitan region. Divided by sub-region of the TriMet service district, these “Service Enhancement Plans” were undertaken to identify and prioritize opportunities to improve bus service as well as pedestrian and bike access to transit, given current and projected population and job growth. These are long-range plans which include dozens of bus service improvements beyond those proposed for implementation over the next year.  

An initial FY19 service plan was developed in fall 2017, at which point TriMet posted the proposed changes on trimet.org to solicit feedback, placed advertisements in newspapers across the service district, conducted on-board outreach and sent postcards to nearby residents of lines with proposed routing changes, presented the proposal to the Transit Equity Advisory Committee, sent emails to riders and other stakeholders, and staff held seven TriMet Open Houses. Based on feedback received, TriMet modified the plan by:

1. Selecting 82nd Avenue as the preferred route option for the New Airport Bus line; and

---

For more information, go to [http://future.trimet.org](http://future.trimet.org)
2. Extending Line 24-Fremont over the Fremont Bridge to Goose Hollow in SW Portland, where it would connect with MAX Blue and Red line service. The Line 24 will continue to serve the stops, including Legacy Emmanuel Hospital, on Vancouver and Williams all the way to Russell.

For the second phase of outreach, the updated plan was posted to trimet.org and many elements of the initial outreach phase were repeated (postcards, newspaper advertisements, emails). TriMet held an open house on February 15, 2018 in North Portland to solicit feedback about the updated proposal. Finally, TriMet held a public hearing at its March 28, 2018 board meeting to receive comments on the proposed service changes.

Responses overall were positive about the proposal. The following is a summary of themes across the feedback received:

- Strong community support for the proposed new Airport Bus line on SE 82nd Ave.
- Support for the service increases to OHSU with Lines 61, 64, 66, and 68
- Strong community support for the proposed new Webster line.
- Support from the City of Troutdale for the proposed routing changes to the Lines 81 and 96.
- Strong community support for the proposed all night service with Lines 20 and 57.
- Advocacy to continue to serve Emanuel Hospital and N Vancouver/Williams; informing decision to continue service on Line 24.

V. Summary of Findings

Table 8 on the next page summarizes the results of the line-level and system-level Disparate Impact and Disproportionate Burden analyses. As shown, Title VI concerns are minimal with the proposed FY19 Annual Service Plan. The proposal promises to improve service significantly for minority and low-income populations, with only three improvements (to the Lines 64, 66 and 31 – New Webster Line) serving areas with relatively low minority populations. Lines 64 and 66 improvements also serve a relatively low proportion of low-income households as compared to the TriMet district. However, improving service on these lines does not raise concerns of an inequitable distribution of benefits given: a) the results of the system-level analysis; b) that the other 9 lines proposed for improvements did not have any line-level Disparate Impacts; and c) that the other 10 lines proposed for improvements did not have any line-level Disproportionate Burdens.

The one proposed service reduction (to the Line 79) also does not appear to create disproportionate and adverse effects given the low concentrations of minority and low-income populations potentially impacted.

Date: April 25, 2018
To: Board of Directors
From: Doug Kelsey
Subject: ORDINANCE 350 OF THE TRI-COUNTY METROPOLITAN TRANSPORTATION DISTRICT OF OREGON (TRIMET) ADOPTING SERVICE CHANGES, UPDATING ROUTE DESIGNATIONS, AND AMENDING TRIMET CODE CHAPTER 22 (SECOND READING)

1. Purpose of Item

Ordinance 350 requests that the TriMet Board of Directors (Board) adopt service changes and update route designations contained in TriMet Code Chapter 22.

2. Type of Agenda Item

☐ Initial Contract
☐ Contract Modification
☒ Other: Ordinance

3. Reason for Board Action

The Board may adopt service changes and update TriMet Code route designations by ordinance. The TriMet Code may be amended only by adoption of an ordinance. The Board conducted a first reading of Ordinance 350 at its March 28, 2018 meeting.

4. Type of Action

☐ Resolution
☐ Ordinance 1st Reading
☒ Ordinance 2nd Reading
☐ Other ______________

5. Background

Ordinance 350 adopts service changes and updates route designations set forth in TriMet Code Chapter 22. The proposed service changes originate from the District’s Service Enhancement Plan (SEP) process addressing the agency’s 20-year vision for bus service improvements within the TriMet district and from public input before and after the initial proposed changes.

A. Proposed Service Changes

Ordinance 350 includes bus service changes for fiscal year 2019. In this fiscal year, 2 new bus lines will be added, 4 bus lines will have trips added due to overloads, 4 bus lines will have increased weekday frequencies, 7 bus lines will have increased span or
new weekend service, and 2 bus lines will have 24-hour service. There are 3 bus lines that will have a route change or extension. The new changes will begin in September 2018 and March 2019 as noted below.

<table>

</tr>
</tbody>
</table>
The complete list of proposed Ordinance 350 service changes are set forth in Exhibit A.

B. Service Change Public Process

The proposed service changes are the result of numerous conversations and meetings with jurisdictions, businesses, customers, and community stakeholders. In addition to outreach activities conducted by TriMet service planners, advertisements regarding the proposed service changes were placed in newspapers across the district during two phases of outreach.

In November 2017, TriMet launched the initial feedback plan for the proposed service changes. TriMet sent postcards to residents around the lines proposed to change, posted signs at affected stops, published ads in community newspapers, rode buses to distribute information, and sent emails to interested parties and riders. TriMet's website solicited feedback about the proposed service changes (www.trimet.org/plan). TriMet also held seven (7) open house meetings around the metro area, including one conducted for Spanish speaking populations.

In February 2018, TriMet used the feedback from the initial phase to update some of the proposed changes and then launched a second round of outreach, including community newspaper ads, postcards, riding the buses to hand out information, and emails to interested parties.

On February 15, 2018, TriMet hosted an Open House at the Legacy Emanuel Hospital to provide information and solicit public comment on the revised proposal. Between 170 and 200 people attended the eight (8) open house meetings held during both outreach phases (the exact number is not known because not everyone signed in).

The service improvements were also reviewed with TriMet’s Transit Equity Advisory Committee, Committee on Accessible Transportation, and HB2017 Transit Advisory Committee. The HB2017 Transit Advisory Committee voted to include the FY19 service improvements in the transportation improvement plan to be submitted to the Oregon Transportation Commission as required by HB2017.

Finally, public comment on the proposed service changes was accepted by phone, email, standard mail, and at all the public meetings. The FY19 Annual Service Change Outreach Report was included in the Board packet for the March meeting and an opportunity for public testimony was provided during the March meeting. A summary of any comments received since the March 28, 2018 meeting will be provided to the Board prior to the April 25, 2018 Board meeting.

C. Title VI Transit Equity Analysis

In accordance with Federal Transit Administration (FTA) Title VI Circular 4702.1B implementing Title VI of the Civil Rights Act, major service changes must be analyzed to identify potential disproportionate impacts to minority and low-income populations. Ordinance 350 includes 12 major service changes.
The TriMet draft Title VI service equity analysis (Report) was provided to the Board before the March 2018 meeting. The Report evaluated potential adverse effects and benefits associated with the proposed major service changes. To summarize, the Title VI concerns are minimal with the proposed service changes outlined in Ordinance 350. The proposed service changes improve service significantly for minority and low-income populations, with only three improvements (to the Lines 64, 66, and 31) serving areas with relatively low minority populations and two improvements (Lines 64 and 66) serving a relatively low proportion of low-income households as compared to the TriMet district. However, improving service on these lines does not raise concerns of an inequitable distribution of benefits given: a) the results of the system-level analysis; b) 9 lines proposed for improvements did not have any line-level Disparate Impacts; and c) 10 lines proposed for improvements did not have any line-level Disproportionate Burdens. The one proposed service reduction (to the Line 79) also does not appear to create disproportionate and adverse effects given the low concentrations of minority and low-income populations potentially impacted.

The results and findings of the Title VI service equity analysis was presented to the Board for their consideration at the March 28, 2018 meeting. The final Report with any supplemental public feedback will be provided to the Board prior to the April 25, 2018 meeting.

6. **Financial/Budget Impact**

Service changes proposed in Ordinance 350 will result in a FY2018 budget impact of approximately $8.0 million, with about half of it paid for by revenues generated by the 2016 payroll tax increase and half coming from HB2017 funding.

7. **Impact if Not Approved**

The Board may choose not to conduct a second reading for Ordinance 350 at its April 25, 2018 meeting. This option, however, is not recommended. The proposed service changes enable TriMet to continue to serve the growing region, provide expanded service, and maintain service capacity and reliability.
ORDINANCE NO. 350

ORDINANCE OF THE TRI-COUNTY METROPOLITAN TRANSPORTATION DISTRICT OF OREGON (TRIMET) ADOPTING SERVICE CHANGES, UPDATING ROUTE DESIGNATIONS, AND AMENDING TRIMET CODE CHAPTER 22 (SECOND READING)

THE BOARD OF DIRECTORS OF THE TRI-COUNTY METROPOLITAN TRANSPORTATION DISTRICT OF OREGON (TRIMET), pursuant to the authority of Oregon Revised Statutes Chapter 267, having considered the transit equity service change analysis Final Report, does hereby ordain and decree the following Ordinance:

Section 1- Adoption of Service Changes

Service Changes are adopted as set forth on the Attached Exhibit A, which is incorporated into and made part of this Ordinance. In accordance with TriMet Code Section 22.05, new Schedule Notices shall be filed for affected lines.

Section 2- Amendment of TriMet Code Chapter 22

TriMet Code Section 22.05 is amended to make the Route Designation updates set forth in attached Exhibit A.

Section 3- Effective/Operative Dates

This Ordinance shall take effect thirty days after the date of its adoption. Operative dates for specific Service Changes and Route Designation updates shall be as designated on Exhibit A.

Dated: April 25, 2018
